

E by SIPLACE

World Class Performance for mid-speed applications

Building on the success of APEX 2017, ASM Assembly systems and our partners Technica USA, will be hosting a roadshow in New England. Visitors can see live demonstrations of the latest E by SIPLACE placement machine and easy to use programming software.

Manufactured by ASM, the worlds largest supplier of electronics assembly and packaging equipment, E by SIPLACE has been designed and built for high mix, low to medium volume and NPI applications. Benefit from technologies developed for high volume manufacturing. State of the art placement heads, the industry's best intelligent feeders and powerful programming software – never before has so much been available in a machine for mid speed applications.

Schedule your private demonstration today!
